### DETAILED ACTION

This Office action is in response to the amendment and Terminal Disclaimer received August 23, 2002.

1. The provisional obvious-type double patenting rejection over 09/577,884 is **withdrawn** in view of the proper terminal disclaimer submitted.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-3, 5-11, 13-20 and 22-25 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by NOZAKI et al '713.

The claimed invention is drawn to a positive photoresist composition comprising:

- (A) a compound capable of generating an acid upon irradiation with actinic rays or radiation and

Art Unit: 1752

(B) a resin capable of decomposing under the action of an acid to increase the solubility in alkali, containing a repeating unit represented by the following formula (AI):

Claim 9 recites the same composition comprising in addition a fluorine-containing and/or silicon-containing surfactant.

Claim 18 recites the specific solvent used in the composition.

NOZAKI et al '5713 anticipates the claimed invention at Examples 3,4,8,13-16 and 66-68, wherein the composition disclose a copolymer comprising a mevalonic lactone and an alicyclic containing methacrylate, see Examples 8, and 13-16. Examples 66-68 disclose a butyrolactone derivative with an adamantyl methacrylate derivative.
